

# NELSON PROPERTY

## WATER & SEDIMENT CONTROL BASINS, GRASSED WATERWAY & CRITICAL AREA PLANTING

Mr. Nelson partnered with the Chisago Soil and Water Conservation District to install two water and sediment control basins (WASCOB), one grassed waterway and a critical area planting on his farm that is immediately adjacent to South Lindstrom Lake. These practices will reduce erosion coming from the agricultural field that is typically in a corn and soybean rotation.

### Partners:

Chisago Soil and Water Conservation District  
Landowner  
Chisago Lakes Lake Improvement District

### Pollution Reduction:

Total Suspended Solids (TSS): 36.6 tons/yr  
Total Phosphorus (TP): 50.2 lbs/yr  
(BWSR Pollution Reduction Calculator)

### Targeted Water:

South Lindstrom Lake

### Completion Date:

May 2018

### May I Visit?

No. The projects are entirely on private
