

WATER TRAIL SYSTEM

A water trail provides an opportunity to connect people to water-related activities for a safe and enhanced experience. In Chisago County, the Water Trail System is being planned as part of the Comprehensive Parks and Trails Plan. A water trail system serves the Chisago Lakes communities in many ways, including promoting outdoor recreation, environmental awareness and education and providing economic benefits to area businesses.

On Saturday, May 7, 2016 a Water Trail Summit was held to learn about different water trails in Minnesota, Chisago County and the Chisago Lakes area. On Memorial Day, community members came together to try out the proposed water trail through seven area lakes. Beautiful weather made for a great day of paddling.

Partners:

- Chisago County
- Minnesota Department of Natural Resources
- City of Lindström
- City of Chisago City
- City of Center City

This map shows potential water trails in southern Chisago County. These trails would use existing public water accesses within the Chisago Lakes Lake Improvement District.

Implementation will require coordination between Chisago County, Center City, Lindström and Chisago City.
